Sweet Cherry Trees

(Budded on Mazzard Roots)

We specialize on growing Cherry trees as our soil and climate is adapted for growing good thrifty trees. Our sweet cherry are all budded on Mazzard seedlings, which has been proven the best understock for sweet cherry.

We take special care to have our varieties true to name and during the growing season we endeavor to keep our trees in the best condition by spraying with a fungicide spray. We have had very good results by using Bordeaux Mixture. If you have had trouble to grow cherry trees, may we suggest that you try this method.

GUARANTEE AND CLAIM. All stock is guaranteed to be true-to-name, dug properly, and in good condition when shipped. Any tree or plant which is untrue to name will be promptly replaced. In case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the nursery products.—As we have no control over its care and usage after it leaves our hands, we cannot guarantee it to live and grow or to give specific results.—We insist that all claims for damaged or unsatisfactory stock be made promptly.

TERMS CASH, except when expressly agreed otherwise.

SUBSTITUTION. We reserve the right in case we are out of a variety, to substitute another of equal merit when it can be done—unless the order is plainly marked **NO SUBSTITUTION**. In this case we will fill the order as completely as possible and refund the balance of remittance, if paid in advance.
